The image shows a code editor window with the title bar 'Positive.java'. The editor contains the following Java code:

```
import java.util.Scanner;

public class PositiveNumber {

    static void askForPositiveNumber() {
        Scanner sc = new Scanner(System.in);

        int number;

        do {
            System.out.print("Enter a positive number: ");
            number = sc.nextInt();
        } while (number <= 0);

        System.out.println("You entered a positive number: " + number);
    }

    public static void main(String[] args) {
        askForPositiveNumber();
    }
}
```

The status bar at the bottom indicates the cursor is at 'Ln 1, Col 1', the file contains '468 characters', the encoding is 'UTF-8', and the line endings are 'Windows (CRLF)'.
